

## Monocyclopentadienyl complexes

## Abstract

- 5 Monocyclopentadienyl complexes in which the cyclopentadienyl system bears at least one unsubstituted, substituted or fused, heteroaromatic ring system bound via a specific bridge, a catalyst system, comprising at least one of these monocyclopentadienyl complexes, the use of the catalyst system for the polymerization or copolymerization of olefins and a process for preparing polyolefins by polymerization or copoly-
- 10 merization of olefins in the presence of the catalyst system and polymers obtainable therewith.
